

MOD-MBL

Media Player Holder Accessory

For use with MOD-FPMS Modular Single Display Mount

Quickly, securely and inconspicuously house a media player control device with Peerless-AV® MOD-MBL Media Player Storage Accessory. Compatible with MOD-FPMS Modular Single Display Mount and variety of Peerless-AV swivel and articulating wall mounts, or can be used as a stand-alone flat wall mount, this media equipment enclosure eliminates the problems associated with securing the media device with tape or straps behind the display or installing it remotely in a wiring closet. It also offers built-in cable management, security and prop-open service access features critical for easy maintenance of digital signage applications. A special arm within the MOD-MBL enables the unit to prop open for easy servicing of the media player or display without taking down the screen or disassembling the mount. This accessory box fits snugly between the display and the mounting plate, enabling the media player and display to be tightly coupled for a neat appearance as well as one-stop installation and access.

Note: Maximum display size is contingent upon attached mount maximum weight. Contact your Peerless-AV Customer Care Representative for specific model maximum load capacity.

Dedicated
